

URBANCART

E-Commerce Business Intelligence & Profitability Analysis

Business Analytics Project | Excel + MySQL

Business Objective

- UrbanCart wanted to understand how its e-commerce business was performing across sales, profitability, customers, marketing and operations.

The analysis focuses on:

- Measuring overall sales and profitability
- Identifying high-performing categories and products
- Evaluating marketing channel performance
- Understanding customer and payment behaviour
- Analysing returns and delivery performance
- Identifying areas for business improvement

Data & Analytical Approach

Data Overview

- 2,500 e-commerce orders
- 1,200 customers and 100 products
- 1,500 customer reviews and 243 returns
- 20 marketing campaigns with delivery and payment data

Tools Used

- Microsoft Excel — Data cleaning, PivotTables, dashboards and visual analysis
- MySQL — Database management, business queries and analytical validation
- PowerPoint — Management reporting and business recommendations

Analytical Approach

- Clean and validate the raw business data
- Analyse sales, profitability, customers, marketing and operations
- Convert analytical findings into actionable business recommendations

2,028

RETURN RATE

11.98%

Overall Performance

- UrbanCart generated ₹68.61 lakh in Net Sales and ₹16.34 lakh in product profit, resulting in an overall Profit Margin of 23.81%.
- The analysis highlights strong category and organic-channel performance, while returns and delivery operations remain important areas for improvement.

Sales & Category Performance

UrbanCart Category Sales & Profit

UrbanCart Monthly Sales & Profit Trend

Key Takeaway: Electronics leads both sales and profit, while monthly performance shows significant fluctuations, highlighting the need for consistent demand and margin management.

Marketing & Customer Performance

UrbanCart Marketing Channel Performance

Customer Type Net Sales & Profit

Key Takeaway: Organic is the strongest acquisition channel, while returning customers contribute higher Net Sales and Net Profit than new customers.

Product & Profitability Performance

UrbanCart Top 10 Products by Sales

UrbanCart Return Reasons & Refund Impact

Key Takeaway: Returning customers contribute higher Net Sales and Net Profit than new customers, while Size/Fit Issues and Damaged Products are major sources of return-related financial impact.

Delivery & Operations Performance

Key Takeaway:

“UrbanCart recorded 722 delayed orders, representing 28.88% of total orders. Delhivery recorded the highest number of delayed orders among the delivery partners, indicating an opportunity to improve delivery reliability and operational efficiency.”

Key Business Insights

- **Strong Overall Profitability:** UrbanCart generated ₹68.61 lakh Net Sales with ₹16.34 lakh Net Profit and a 23.81% margin.
- **Electronics Performance:** Electronics generated ₹15.25 lakh Net Sales and ₹4.17 lakh Net Profit, with a 27.36% margin.
- **Organic Channel Strength:** Organic generated the highest Net Sales at ₹20.50 lakh and ₹5.07 lakh Net Profit.
- **Return Impact:** 243 returns resulted in approximately ₹8.42 lakh of refunds, creating a significant financial impact.
- **Delivery Challenge:** 722 orders were delayed, representing 28.88% of total orders.

Recommendations & 30/60/90-Day Action Plan

30 Days — Stabilize

- Reduce returns from Size/Fit and Damaged Product issues
- Review low-margin products such as Sneakers and Jackets
- Analyse delayed orders by delivery partner

60 Days — Improve

- Increase focus on high-performing Organic acquisition
- Improve product pricing and discount strategy
- Strengthen repeat-customer engagement

90 Days — Scale

- Scale high-margin, high-demand products
- Reallocate marketing budget based on channel performance
- Build monthly KPI tracking for Sales, Profit, Returns and Delivery
